

Declaration of Equivalence

We ForaCare Suisse AG, are committed to continuously improve our products, and we are conducting clinical validations which are done internally and externally above and beyond the legal and CE requirements.

As part of this process, striving to provide our patients with the latest and best technologies and with the utmost care, ForaCare regularly conducts clinical validations using a blood glucose monitoring system that is identical to another system.

We hereby declare that the device validated in the IDT Institute (Germany), **Diamond PRIMA** (DM10) uses the same strips, formulas and the IC chip on the BGM system and is identical in nature, and manufacturing to the **Diamond VOICE** (DM20), the **Diamond MINI** (DM30), and the **iDiamond**.
